

1  
The imposing roof design also provides cover for a balcony

2  
The use of upper floors makes the best use of available space

3  
Staircases are available in wood or aluminium

## The Product

The Galeria roof is available for single, double or triple storey structures and is a real eye-catching feature that also provides cover for terraces or balconies.

## Design

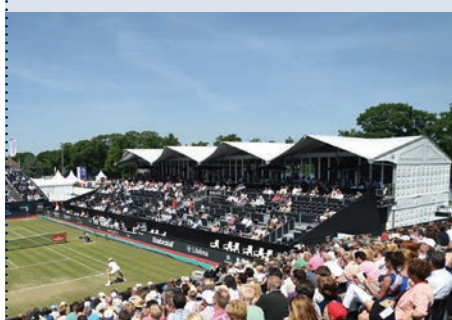

The Galeria is supplied with rigid PVC sidewall panels or glass panels and the distinctive roof canopy is supplied in opaque (non-permeable to light) 80% PVC fabric. The Neptunus rain gutter tensioning system also ensures that the roof canopy stays taut at all times and rainwater is drained at central points. The structure is equipped with a raised Neptunus cassette floor as standard. Balconies are available cantilevered at 2 metres wide or 4 metres wide with supporting legs and wooden or aluminium staircases are provided.

## Features

The Galeria is available in widths of 12 or 16 metres, with unlimited lengths that are extended in increments of 5 metres and the overhang to the roof canopy creates a 4 metre cover.

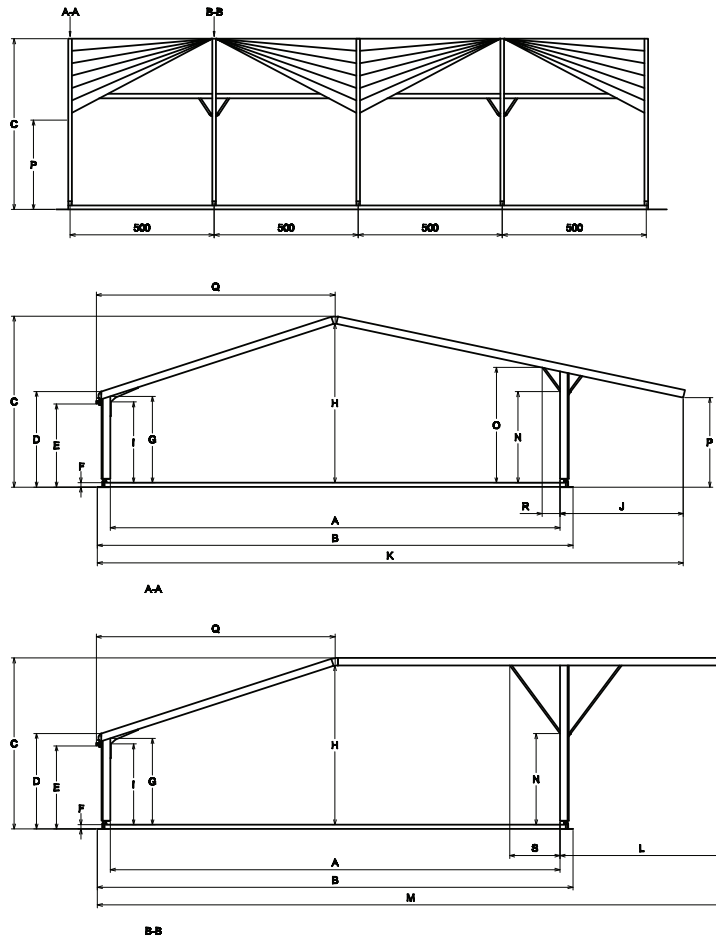

## Applications

When space is at a premium or a view is picturesque or critical the Neptunus Multi-deck Structures with a Galeria roof are the ideal choice and are often seen at sporting events, horticultural events and trade fairs.
