

1 Fully round structure (360°)

2 Free internal height of 9, 11 or 13 metres

3 Stunning eye-catching design

Product

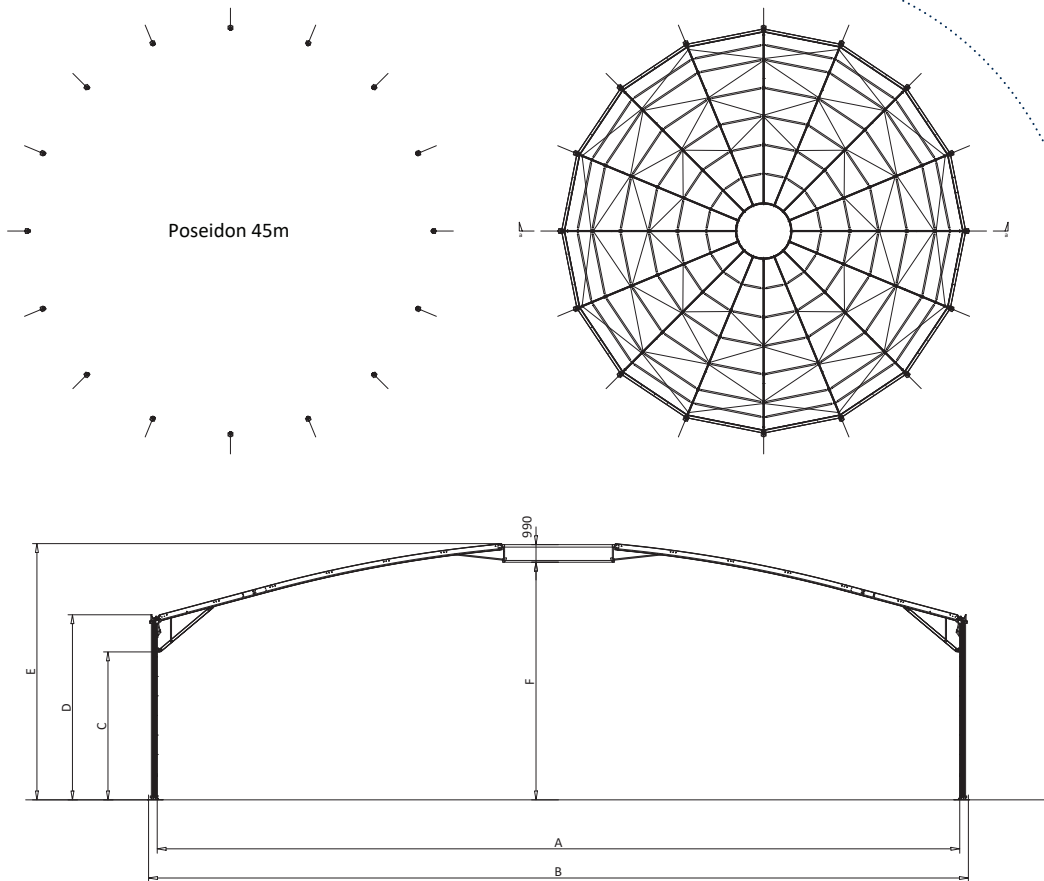

Exclusive, impressive and astonishing. The Poseidon is our latest development for high-class events. A round presentation space for a new product? Hospitality for a top-level sporting event? Or an exclusive meeting for key relations? The Poseidon gives every event a sensational stage.

This fully circular structure with a clear span of 45 metres and a max internal height of 14 metres offers high-quality possibilities for corporate events, fashion shows, presentations, product launches, sports events and festivals. Placing a waterfall in the middle of the structure is optional but can create a spectacular effect. The Poseidon with integrated waterfall was first built at the Tomorrowland festival in 2022 for an exclusive use

The Poseidon is an aluminium structure with a standard free span of 45 metres and a floor area of 1590 square metres. It can be built with a sidewall height of 6, 8 or 10 metres. The internal height in the middle of the structure is therefore 10, 12 or 14 metres respectively. There are therefore many possibilities to furnish this structure entirely according to the style of your event. Thanks to the special Neptunus rain gutter, the roof skin is always tight, and rainwater is drained at central places.
